“Deaconess Health System, a premier provider of healthcare services to 26 counties in three states (Ind., Ill. and Ky.), will be the first hospital system to implement the COVID Response Mobile App for its staff.”

Security – Secure, performance-based mobile platform

Speed – Deploys in as little as 72 hours

Timely – Push notifications and alerts for breaking news and vital updates

Supported – MobileSmith Managed Services to support content development

COVID Response Mobile Apps are designed to support hospitals and health systems in their response to the COVID-19 Coronavirus pandemic. The secure mobile platforms can be deployed in as little as 72 hours and provide timely push notifications and alerts to convey breaking news, vital updates, and customized facility information.

Now available in two versions to engage hospital patients, staff and volunteers, COVID Response Mobile Apps help health systems relay the latest and most accurate guidance, data and alerts to those who need it most.

COVID Response - Staff

- Secure environment for health system leadership to communicate with all stakeholders.
- Internal user groups and forums to manage staff deployment.
- Reference libraries for sharing video and other content.

COVID Response - Community

- Optimized care coordination to communicate more effectively with the community.
- Real-time mobile access to virtual or telehealth assessment and screening tools.
- The most current, accurate and regionalized COVID-19 information available.
